

## GATE 2 -- LANE AVAILABILITY

In an ever continuing effort to improve traffic flow onto the installation a new traffic pattern will be instituted at GATE 2 (Strom Thurmond Blvd) starting 6 Sept 2010.

Between the hours of 0700-0900 (Monday –Friday) all inbound and outbound traffic will not be permitted to make any left turns at the intersection of Magruder Ave/Moseby St and Strom Thurmond Blvd. All left turn lanes will be blocked during this time to help alleviate congestion at the gate and to expedite the flow of traffic.

For example: If you are traveling from Moseby Street you will only be permitted to make a right turn onto Strom Thurmond Boulevard to exit the installation out of Gate 2. Operators on Magruder Avenue will only be permitted to make a right hand turn onto Strom Thurmond Boulevard. If you wish to exit the installation via Magruder Avenue you will have to take an alternate route or utilize another Gate.
